AeroLock™ 150

CONCEALED FASTENED METAL ROOFING

ABOUT THE PANEL

AeroLock 150 is a 1-1/2" snap-lock standing seam panel that gives a clean, architectural roofline with no exposed fasteners. The panels snap together by hand with no mechanical seamer.

Concealed clips hold the panels down and let the metal expand and contract with temperature. Clip relief rolled into the pan lets the clips sit flush, so the panels lie flat and the seams run straight.

TECHNICAL SPECS

- Minimum Slope: 3:12 Pitch
- Seam Height: 1-1/2"
- Coverage: 16" (12"–24" Available)
- 24 / 26ga Painted Steel
- Snap-Lock Seam, No Seamer Required
- Concealed Clip Attachment
- Solid Decking
- Cut to Length
- Roof or Wall Application

THE FEATURES

- Clip Fastened Snap-Lock
- No Exposed Fasteners
- Built-In Clip Relief
- Allows Thermal Movement
- Optional Minor Ribs or Striations
- Non-Combustible
- Low Maintenance

LIFETIME WARRANTY
