

Type B Deck

WIDE-RIB STEEL ROOF DECK

ABOUT THE DECK

Type B is a 1-1/2" deep, wide-rib steel roof deck for commercial and industrial buildings. Its wide top flanges give rigid insulation a flat, continuous surface to bear on.

Type B spans efficiently between steel joists and beams, and works as a structural diaphragm when fastened to the engineer's pattern. Sheets go down fast with welds, screws or pins.

TECHNICAL SPECS

- Depth: 1-1/2"
- Rib Spacing: 6" O.C.
- Coverage: 36"
- Top Rib Opening: 2-1/2"
- 22 / 20 / 18 / 16 Gauge
- G60 / G90 Galvanized or Primed
- Nestable Sidelaps
- Cut to Length
- Steel Joist or Beam Support

THE FEATURES

- Wide-Rib Strength
- Long Span Capability
- Insulation-Ready Flanges
- Structural Diaphragm
- Weld, Screw or Pin Attachment
- Non-Combustible
- Fast Installation
