Post frame BUILDINGS

VERSATILE

DESIGN FLEXIBILITY

U.S.A. MADE & EASE OF INSTALLATION

versatile

Our post frame building kits with steel trusses allow you to **build structures anywhere from 8' to 100' clearspan and 10' truss spacing**. Plus, they offer beauty & durability for your barns, carports, RV covers, entertainment areas or wherever else your imagination takes you!

flexible design

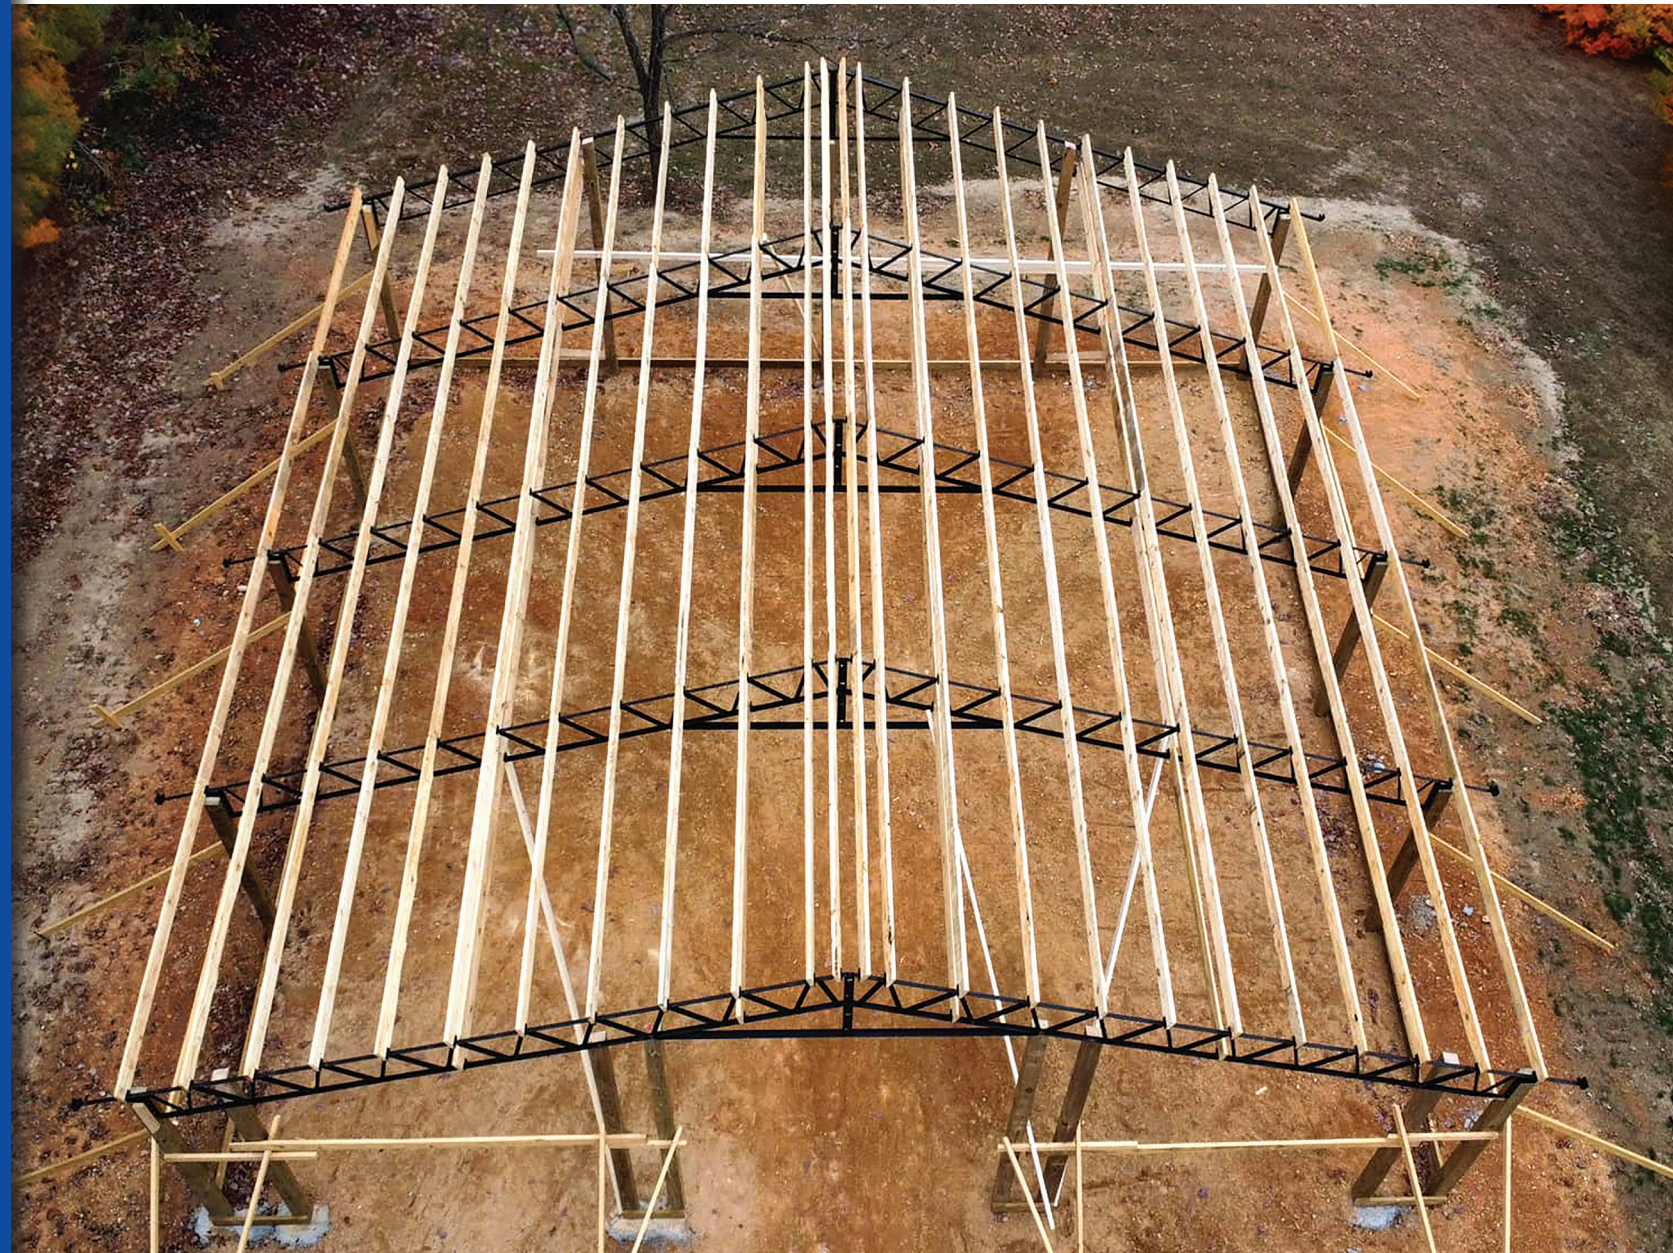

The flexible design of post frame construction allows for **a variety of configurations and sizes**, so your building is perfectly suited for your intended use. And if your needs change, **expansion is extremely simple**: just add posts & steel trusses to build on to your structure!

ease of installation

Our post frame buildings offer an easy setup utilizing steel trusses that are built especially for post frame applications. **With simplicity in mind, your building can go up quickly - saving you on both labor and material costs.**

why post frame?

what is post frame?

Post frame is a building system that utilizes structural wooden post columns as the primary support, along with wooden girts, purlins, and steel trusses to complete the frame.

Though steel trusses and other steel anchors and accessories are used, post frame buildings fall under the broad category of wood-based framing systems.

Post frame is widely loved for its versatility, design flexibility & easy installation, which often equates to cost savings.

AMERICAN STEEL TRUSSES

Specifications

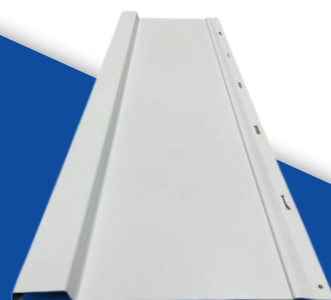

- 1-1/2 x 1-1/2" x 1/8" Steel Chords, Base, and Vertical Ends
- 1-1/4" x 1-1/4" x 1/8" Webbing
- ASTM 50 KSI Steel

Ratings

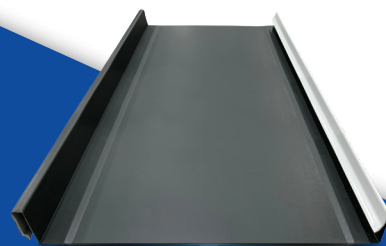

- Roof Live Load -20 PSF
- Ground Snow Load - 15 PSF
- Design Wind Speed - 105 mph
- Wind Risk Category II
- Wind Exposure Category C
- Allowable Dead Load - 10 PSF at 10' OC spacing

Cost Savings

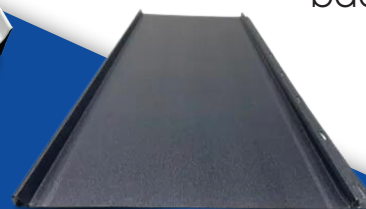

Replacing wood trusses with steel trusses will reduce labor & wood materials, putting more money back into your pocket.

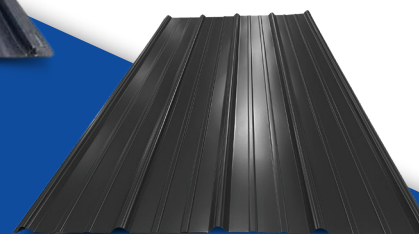

Board & Batten Steel Siding

TrueLock 175 Metal Roofing

DuraLock Metal Roofing

Tuff-Rib Metal Roofing

METAL SIDING & ROOFING

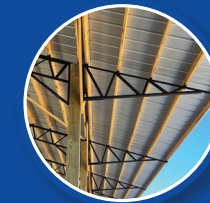

- American Steel
- American Coatings
- American Workers
- Cost Saving
- Energy Efficient
- Lifetime Warranty

All our coated steel is sourced from Steel Dynamics Inc., milled right here in the USA. Matching that quality is the Sherwin Williams coil coatings. This household name creates the highest quality, most consistent paint for coated coils. For this reason, we have a lifetime warranty on the metal siding & roofing painted coatings.

GABLE TRUSS

SNOOT TRUSS

LEAN-TO TRUSS

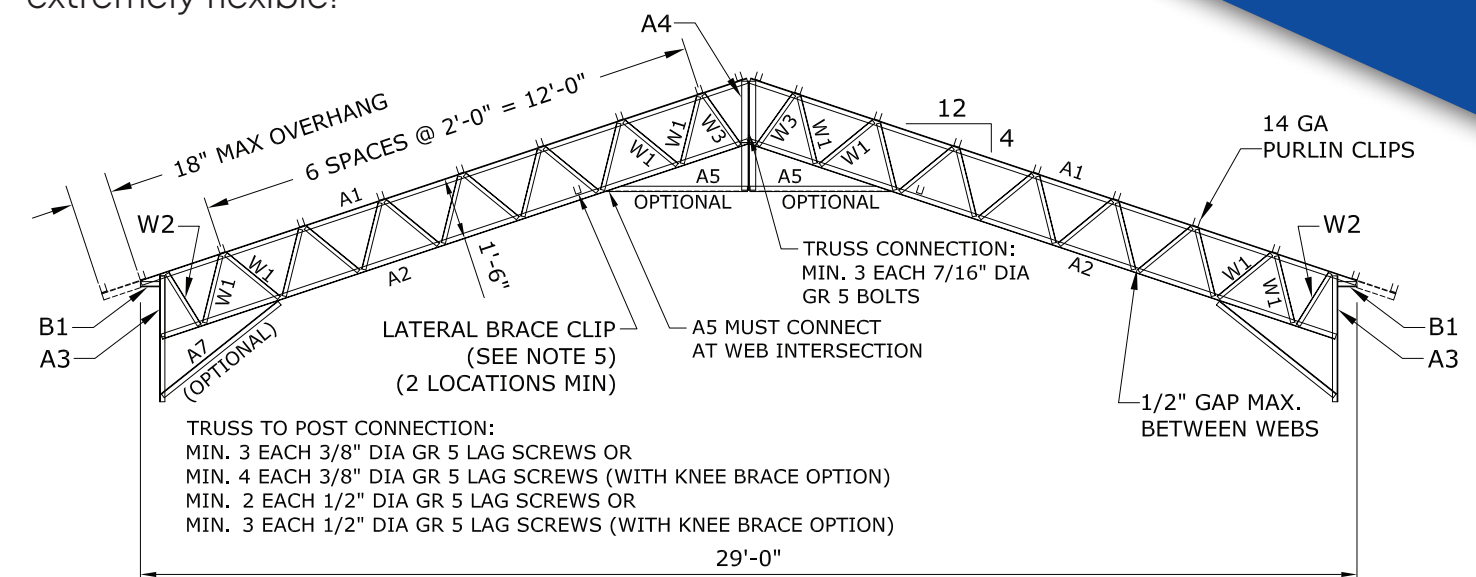

BAR JOIST TRUSS

Simple. Easy. Superior Strength.

Our parallel chord steel trusses create maximum overhead clearance, allowing you more storage space. With clear-spans from 8' to 100' for gable trusses and up to 30' for lean-to trusses, your building possibilities are extremely flexible!

DOORS & WINDOWS

Walk Doors Specs

- Polyurethane foam core
- 37 5/8" x 73 13/16" overall head to out
- Aluminum, universal threshold
- 1-3/4" thickness
- Smooth, polar white 26ga steel
- 3-1/2" frame depth

Roll Up Doors Specs

- Galvanized grade 80 steel
- Coated with super durable polyester paint
- 40-Year limited warranty
- 9-1/2" barrel
- 26 gauge door curtain
- 2" deep, 18ga guide

Windows Specs

- Vinyl construction
- Weathertight fusion-welded
- Multi-chambered frame
- 3/4" insulated glass
- Horizontal & vertical options available

Sliding Doors

Roll-Up Doors

Windows

Walk Doors

ACCESSORIES

SKYLIGHTS & SIDELIGHTS

- 100% UV protection & high transmission of natural daylight
- Colors: white, clear & smoke
